Recent Projects

Minimum [Ruby on Rails, React.js/Redux]   **Live | GitHub**

Single page web app inspired by Medium.

- ❏ Utilizes RESTful Rails API with JSON response format to provide stateless user authentication and Story CRUD request from users
- ❏ Stores image uploads in the cloud using AWS S3, allowing for app scalability
- ❏ Binds AJAX requests on user inputs when composing a story, providing real time draft creates and updates for users
- ❏ Created partials and common React components to keep code DRY

Puyo-Puyo [JavaScript, jQuery, CSS]   **Live | GitHub**

Tetris like puzzle video game built using JavaScript.

- ❏ Increases the velocity of the objects falling down to increase stage difficulty
- ❏ Incorporates HTML5 canvas and requestAnimationFrame API for smooth and dynamic rendering of objects, allowing for polished motions in game

Chess [Ruby]   **GitHub**

Terminal chess game built using Ruby with OOP in mind.

- ❏ Utilizes OOP principles by implementing classes and inheritance to provide modular structure and keep code DRY

Skills

Ruby	JavaScript	React.js	Flux (Redux)	jQuery	
Ruby on Rails	HTML/CSS	SQL	AWS	Git	(RSpec)
